DUNDEE DIRECTORY,

1905-1906.

GENERAL NOTICE.

INFLUENCED as Dundee essentially is by well-known laws which regulate supply and demand, we have this year had no reason to be especially gratified with the results which are sometimes expected to accrue therefrom. In commercial circles there have been no abnormal spurts of business so common to various periods; pressing demands, involving activity on the part of all concerned, were conspicuous by their absence; and for orders, the magnitude of which brought a thrill of gratified pleasure to employer and worker alike, we have had to "hark back" to other days. On the contrary, there has been a reign of vacillation, so uncertain and unstable in its issues that it pulsated between a partial stoppage of machinery on one hand and the total closing of works on the other. To some extent these have been the characteristics of the jute trade all over for a considerable time, but they became materially accentuated during the first six months of the year. With marked determination producers hung on, in spite of adverse conditions, in expectation that the forthcoming jute crop, anticipatory forecasts of which were infused with a favourable tone, would relieve the situation. Large quantities of raw material consequently passed through hands, and a hopeful feeling pervaded the markets. These happy auguries eventually were not realised. From some cause, never sufficiently explained, the forecasts, which threw a rosy hue over the expectant crop, proved disappointing. That meant, if not disaster, at all events obvious limitations, and the effect of this disturbing element upon all conberns, large and small, to say the least, was acutely depressive. The situation, too, was rendered more tense by the enterprise of dealers n Calcutta, where something like a "corner" in the raw article was initiated. As a sequence the price of jute at home went up with great bounds, till it reached a point which made it impossible for nanufacturers who were not fairly bought in to produce goods without sustaining loss more or less heavy. The last six months of the year, therefore, have been fraught with perplexity to employers, and a considerable measure of privation to workers. Employers generally were loth to stop their works as a whole, and thereby throw thousands of people idle; preferring rather, in a discriminating way, to runhose sections most convenient for their immediate purposes, ind keeping as many hands employed as possible under the ircumstances, and shutting down those parts which pressed most neavily upon their productive resources. This wise step deserves commendation, as it averted excessive hardship amongst workpeople. Notwithstanding these drawbacks, a number of manufacturers have lone fairly good business throughout the year. That is so far satisfactory, but these exceptional conditions were confined to the few; the many, to put it plainly, have found themselves circumscribed, if not jeopardised, in their operations. These untoward conditions, it is to be feared, will prevail more or less till our jute records give favourable indications of a lowering figure. A useful lesson, however, has been inculcated by these industrial episodes. It will have the effect of putting a bridle upon rash indulgence in the speculative buying and selling of raw material, and at the same time materially influence dealers to be careful not to count upon their eggs till they

are fully hatched.

Whilst the textile industry has been plodding along in a semidevious course, most other professions which depend largely upon it have perforce had to follow in its wake. Building enterprise, which during recent years has transformed an old-fashioned, smoky town into a modern city, can only be adequately described as extremely Speaking generally, building and cognate trades are no worse than they were a year ago, though their condition then was anything but encouraging. There is, however, a tendency still to erect tenements and villas for investment purposes. As in former years, this development is principally shown along the lines of the tramway routes, while at the various termini numerous villas and cottages continue to be constructed. In the Blackness and Fairmuir districts this is most apparent. Whilst there is no evidence of a building boom, the tendency is likely to be maintained in judicious building for investment purposes. In the eastern Clepington district, along the east side of Arklay Street, a good deal of activity exists through the erection of tenements, provision being made for a large number of two-roomed houses of good class. In the same quarter a commencement has been made with the building of a new church for the managers of Clepington U.F. Church. Of private edifices there are none of outstanding significance, if we except the new offices for the proprietors of the Dundee Courier. This fine building, which bears the impress of great stability, is making rapid progress, and from its chaste architecture it will form one of the most imposing blocks in the central part of the city. The Cancer Hospital at the Infirmary is now about finished; and another important work in progress is the erection of a Cancer Ward as a wing to Victoria Hospital, to defray the expense of which £5000 has been provided by ex-Provost Moncur. The Directors of the Royal Infirmary are also doing their best to keep the Infirmary abreast of the times by introducing many important improvements, more especially in the way of sanitation, the appliances for which are being brought up to date. The Arthurstone Library, which has been completed and opened, has proved an unqualified success; but so far nothing has been done towards the provision of sites for additional District Libraries. Amongst the community generally there is a feeling that these are not necessary, the opinion being that the wants of the city in this respect are sufficiently met by the resources already established. Through the generosity of Mr Robert Fleming, London—an old Dundonian—a much-needed improvement has been effected at University College, that gentleman at his own expense defraying

the cost of a gymnasium and "fives" court within the ground, along

west side of Small's Wynd.

Dealing with the question of public works, much satisfaction has been expressed in connection with the proposed early commencement of the new tramway which is to be constructed between the Eastern boundary of the burgh and Monifieth. It is anticipated that this undertaking will be the means of developing building operations contiguous to the lines, and thereby connect the immediate eastern portion of the city with Broughty Ferry. Other works of a public nature are under consideration. The School Board continues to advance in the improvement of the schools under their charge. For years the accommodation of Ancrum Road School has been too limited, and recently it was arranged that it should be almost doubled. To meet the requirements of the increasing population at the northeast end, the Board propose to erect an additional school in that locality.

With regard to Municipal undertakings, not much can be said. The Town Council perforce have been in an economic frame of mind during the year; and, while the expenditure has not been anything like that of previous years, the works have been of some importance. The success which has attended all our District Public Wash-houses and Baths has induced the Council to proceed with other undertakings of a similar nature. The requirements of the other parts of the city having been met, it was resolved to act similarly towards the residenters of the west end. A suitable site having been secured in Miller's Wynd, close to the densely populated parts of Hawkhill and Perth Road, a commencement has been made with the new buildings,

which will cost about £7,000.

The Fruit and Flower Markets at Craig Street have more than justified the action of the Council in adding a range of handsome shops along the west frontage of the market, next South Union Street,

and the provision of a number of booths within the market.

Our Tramways continue to prosper, so much so that the accommodation at the different depôts has been found inadequate. The Council have, therefore, resolved to extend the Central Tramway Depôt at Lochee Road. It is further hinted that at the same place the accommodation for the Electric Station is also insufficient, and the question of extension in that department is also under consideration.

Other improvements, though not numerous, but sufficiently important in themselves, include the completion and opening up of St Andrew's Street, forming a fine, commodious connecting thoroughfare between Seagate and Cowgate; and the opening up of thoroughfares between City Road and Ancrum Road, Lochee, and between Arklay Street and Provost Road. These two last-mentioned streets, as well as one which has been formed off east side of Glamis Road, were entered upon mainly with a view to give relief to the unemployed, the distress amongst the labouring class having been fairly acute during winter. Rapid strides are at the same time being made by the Public Health Department. The sanitary improvement of dwellings, the cleansing of areas, and the disposal of domestic

refuse being effectively dealt with. The reclamation works at Esplanade Extension, which for a number of years have been under weigh, continue to make satisfactory progress, and several acres have been added during the year to the already extensive recreation ground on the river frontage at Magdalen Green. The north-west corner of Baxter Park, which adjoins Pitkerro Road and Wortley Place, has undergone considerable improvements, and what was formerly a confined corner of the Park has been opened up and beautified. The widening of Bellfield Lane, Hawkhill, to Blackness Road has been favourably considered, and it is expected that this

old thoroughfare will soon be made suitable for heavy traffic.

Our obituary embraces the names of a number of citizens of merited repute. These include the Rev. John Rankin, a devoted Christian and zealous adherent of the Catholic Apostolic Church, who, during an active, strennous life of good work and charity, died at the advanced age of 93 years. Mr George Watt, Sheriff Clerk of Forfarshire, a man of quiet, unobtrusive habits, but of excellent capabilities, a sound lawyer, and versatile man of business, died at Broughty Ferry on the 10th May 1904. Another man of outstanding merit passed away on the 11th May in the person of Mr William Alexander, City Architect. Mr Alexander, who was the eldest son of Mr Charles Alexander, a former proprietor of the Courier and Argus, was one of the most noted public officials of his day. whole of the work belonging to ancient royalty of the Burgh was carried on under his supervision, and he also acted as architect to the successive Boards of Liff and Benvie, the Combination Parochial Board, and Parish Connoil. Mr James Berry, who expired on 15th May at Newport, was a well-known personality. Apart from his popularity in commercial circles, he was one of the best known members of the Masonic order in Forfarshire, in which body he held several high offices, the duties of each being discharged with an ability which met with the sincere approval of his brethren. A man of more than ordinary note in the person of Mr John Ronald departed on the 4th June. Mr Ronald, who was a native of St Andrews, was keeper of the Kinnaird Hall for close on thirty years. The probity of his character and the geniality of his disposition made him a favourite with all classes. Amongst the list who have gone before are Mr John More Smieton, a cultured gentleman and a composer of considerable ability; Mr George Petrie, a well-known antiquarian, and publisher of Lamb's monumental work, "Dundee: Its Quaint and Historic Buildings"; Rev. Dr A. B. Connel, the esteemed minister of Lochee West U.F. Church; Mr John F. White, LL.D., a man of splendid parts, a shrewd merchant, and a literateur of no mean capacity; Mr Peter Fleming, emigration agent; Mr Peter Proudfoot, one of the pioneers of our postal system in Dundee; and Mr James Lamb, the last surviving son of the well-known founder of the Lamb family in the city.

FOREIGN AND COLONIAL POST CARDS.

Single and Reply Official Post Cards are transmissible to all parts of the world—Single Cards, 1d each; Reply Cards, 2d each. (Inland Post Cards are transmissible abroad if the additional postage required is supplied by postage stamps being affixed.) Engravings or advertisements may appear on the front of a Post Card, if they do not interfere with the clear indication of the address, in addition to the name and address of the recipient in writing or on a gummed label not exceeding in size 2 inches by $\frac{3}{4}$ in., and the name and address of the sender indicated in writing, or by means of a stamp, or any typographical process.

Private Post Cards bearing adhesive stamps of the value of one penny, and private reply cards with adhesive stamps of the value of one penny on each half, may be sent as post cards to places abroad, provided that they are in conformity with the official post cards. They must be of the same size and substance as the official cards, and must have the words "Post Card" printed or written on the address side. The reply halves of private double cards must bear the words "Post Card—Great Britain and Ireland" and "Reply." Plain cards without any inscription cannot be sent abroad as Post Cards.

FOREIGN AND COLONIAL PARCEL POST.

Parcels which somewhat exceed 2 ft. in length are accepted for transmission to Azores (via Lisbon), Bulgaria, Caroline Islands, Corsica, France, Italy, Luxemburg, Montenegro, Norway, Persia, Russia-in-Europe, Samoa (via Hamburg), provided that their other dimensions are inconsiderable.

For Argentine Republic, Bolivia, Brazil, Cape Verd Islands, Chili, Congo Free State, Crete, Dahomey, Dutch Guiana and East and West Indies, Erithrea, French Congo, French Guiana, French Guinea, French Somali Coast, Greece, Guadeloupe, Ivory Coast, Madagascar, Malta (via France), Mexico, Miquelon, New Caledonia, Paraguay, Portugal (via France), Portuguese Timor and West Africa, Reunion, Senegal, Tahiti, Tripoli (Africa), Tunis, Turkey (Austrian and French Agencies), Uruguay—greatest length, 2 ft.; greatest length and girth combined, 4 ft. Parcels slightly exceeding 2 feet in length are admitted (if their other dimensions are small) to Algeria, Azores (via France), Comoro Islands, Ecuador, French Indo-China, German South-west Africa, Peru, Spain, Venezuela.

For Canada—Greatest length, 2 ft. 6 in.; length and girth combined, 6 ft. For Japan—Greatest length, 2 ft.; greatest length and girth combined, 6 ft. For places named in the Table of Parcel Postage—other than those detailed above—same as for Inland Parcel Post.

The postage must in all cases be paid in advance, by means of postage stamps affixed by the sender. Each parcel must be plainly directed, and should bear the words "Parcel Post" in the upper left-hand corner, and the name and address of the sender. The date of posting should also be added. A parcel must not be posted in a letter box, but, as in the case of the Inland Parcel Post, must be taken into a Post Office and presented at the counter.

Parcels will be liable to Customs duties and regulations, and the sender of each parcel will be required to make a Customs declaration furnishing—upon a special form provided for the purpose, which can be obtained at any Post

Office—an accurate statement of the contents and value, the date of posting, and other particulars. Arrangements have been made with many Foreign Countries whereby senders may take upon themselves the payment of the Customs charges if they so desire.

Parcels for His Majesty's ships cannot, as a rule, be accepted for transmission unless the name of the particular place, to which in each case the

parcel is to be forwarded, forms part of the address.

No letter whatever may be sent in a parcel addressed to any Foreign Country, or to Australia, British Central Africa, Canada, Cape Colony, Natal, South Africa, Fiji, Jamaica, Mauritius, New Zealand, Rhodesia, Seychelles, Straits Settlements, and Trinidad. Invoices in open envelopes, giving particulars of the goods contained in the parcel may, however, be enclosed.

Parcels containing coin, watches, jewellery, or any article of gold or silver, cannot be sent by Parcel Post to any Foreign Country or British Possession included in the insurance system, unless they are insured for at least part of

their value, and packed according to special regulations.

Parcels should be securely packed, and must, if for Foreign Countries, be so sealed that they cannot be opened without the seals being broken.

POST OFFICE TELEGRAPHS.—INLAND TELEGRAMS.

The charge for telegrams throughout the United Kingdom is 6d for the irst 12 words, and $\frac{1}{2}$ d for every additional word. Addresses are charged for. The telegram forms are of two kinds, the "A 1" form, embossed with a stamp, and the "A" form (given gratis), with no stamp. The "A1" forms

nay be purchased singly. They may also be had in books of 20, interleaved,

and with a sheet of carbonic paper, price 10s 2d each book.

When the terminal office is a Head Post Office, the amount paid for ransmission covers the cost of delivery within three miles or within the town postal delivery when that extends for more than three miles. But when it is not a Head Post Office, the message is delivered free within three miles only. The porterage on messages for places beyond the limits of the free delivery will be at the rate of 3d a mile or part of a mile, the charge being reckoned from the office door.

Copies of a telegram directed to more than one person in the same free lelivery are delivered at a charge of two pence per copy, in addition to a half-

penny for each word in the address of the copy.

Persons not wishing to send to a Telegraph Office may post a telegram in an nvelope addressed "Telegram, Immediate" in a wall or pillar-box, or Sub-Post Office. Telegrams so posted are sent on by next collection to the Telegraph Office for transmission free of extra charge, provided that the

proper amounts have been prepaid.

No combination of words is counted as one, with the exception of those which are ordinarily written as one, or coupled by hyphens, as "mother-in-aw," "forty-seven." Certain exceptional names, such as O'Neil, MacDonald, De la Rue, are charged for as single words. So, too, are names with the preix "St," as St Pancras; but double names of persons, like Smith-Payne, are ounted as two words.

Abbreviations of words, "can't," "won't, "don't," are counted as single

Figures are counted at the rate of five figures to a word. Fractions are ounted according to the number of figures employed, one figure being added or the mark of division. In groups of figures a stop is counted as a figure. The symbols o/o, a/c, b/l, and c/o are each counted as one word. In ordinal numbers the affix st, nd, rd, or th is counted as two figures—thus "1st" ounts as one word, "1432nd" as two words. When figures are preceded or ollowed by a letter (except in the case of ordinal numbers), the letter is ounted as a word. Initial letters are each counted as one word, with the xception of the initials of the London Postal Districts, which are counted as ne word for each group. Names of towns and villages in the United Kingom are counted as one word each.

Anyone may have an abbreviated address registered on payment of a guinea year, but the registration of abbreviated addresses is not recommended.

The cost of a reply, not exceeding forty-eight words, may be prepaid, and a

eply form will then be delivered to the addressee, who will be at liberty to end his reply, from any telegraph office, at any time within two months.

Telegrams can be repeated, if the sender desires it, by being signalled back rom office to office. No copy is, in such case, given to the sender. The harge for repetition is one-half the ordinary tariff. Telegrams containing percantile quotations or figures, and telegrams written in cypher, or according o a preconcerted code, should always be repeated.

FOREIGN TELEGRAMS.

Foreign telegrams are of two kinds, telegrams in plain language and telerams in secret language. Those in plain language are composed of words, figures, and letters conveying an intelligible meaning. Those in secre-

language are divided into: (1) preconcerted language or code, (2) cypher.

Code language is composed of real words not forming comprehensible phrases, or of artificial words having the appearance of real words. Words of more than ten letters are not allowed. In Code telegrams English, French German, Italian, Spanish, Portuguese, Dutch, and Latin, may be employed whilst artificial words must be pronounceable according to the usage of these languages.

Cypher telegrams are those containing figures or letters having a secremeaning. It also includes groups of letters which cannot be pronounced according to the usages of the languages. Letter and figure cypher cannot

be combined.

The address of the sender is charged for, if transmitted; in any case

it must be written at the foot of the form.

In telegrams written in plain language the length allowed for a word is 1! letters. Additional letters are charged for at the rate of 15 letters to the word Subject to the limit as to number of letters, ordinary compound words and names of persons and places, &c., written without break or interruption, are counted as single words. If joined by a hyphen, or separated by an apostrophe

they are counted as so many separate words.

Compound numbers written in words and without break are also counted as single words subject to the same limit as to the number of letters. The name of the office, county, province, and country of destination in the addresses of telegrams are each charged for as one word whatever their length.

Every separate letter or figure is charged for as one word. Groups of letters in cypher and groups of figures are counted at the rate of five to a word. Bars of division, decimal points, and stops used in the formation of numbers are counted as figures. Letters added to figures to form ordinal numbers are counted as figures.

If the sender desires to prepay a reply he must insert before the address of the receiver "R P—", which is charged for as one word. A less sum than 10d cannot be accepted in prepayment of a reply.

LUCAS'S PATENTS.

All of which are working and giving entire satisfaction.

WE GUARANTEE THE QUALITY OF ALL.

LOWDEN'S PATENT.

OUR improvements are connected with the flyers, the object being to construct these in a simple and economical manner, and in a way which will permit of the socket being easily removed.

The advantages of such a detachable arrangement are:-

It may be made of steel and hardened, and it can be easily renewed withou destroying the legs and the body of the flyer, and it is also in one piece.

THOMSON'S PATENT.

THIS invention relates to an improved method of lubricating and retaining the oil in the bearings of upright spindles, such as the upright spindles of flax and other spinning frames, and has for its object to save labour and oil and at the same time provide an efficient lubricating bearing.

The improved spiral arrangement may be applied to plain bearings as wel

as to conical bearings.

By the employment of this you will find that oiling once a day is all that i required, instead of three times a day with the ordinary spindle bearings a present in use, owing to the arrangements being such that when the spindle i revolved the oil is forced up the spiral groove by centrifugal force, and on the spindle being at rest the oil is retained in the well and so prevented from being lost, as also from dirtying the other parts of the machine.

LUCAS'S PATENTS—Continued.

TESTIMONIAL.

LESLIE, FIFESHIRE, 4TH JANUARY 1899.

Messrs Edward Lucas & Son, Dronfield Foundry, nr. Sheffield. Dear Sirs,

We have much pleasure in testifying to the worth of "Thomson's Patent Spindles" supplied to us by your firm in the end of 1895. They have given us entire satisfaction in the working, and we estimate the saving in oil and labour to be fully 50 per cent. as compared with what we used on your ordinary spindles formerly.

We are, yours truly, WM. LIVINGSTON & SONS.

SAML. LUCAS'S PATENT SPINDLE

HAS a collar hardened and fixed under the screw, which can be replaced; and spindles worked down at the shoulder can have this patent collar put on at a small cost. The advantage of this collar is that it prevents the shoulder at bottom of screw becoming untrue by the flyer coming down on shoulder when working, the collar being equal in temper to the flyer. Many thousands of these patent spindles are now running, and are much approved. Also with steel tempered blades.

Over 50,000 running satisfactorily, and repeat orders coming continually.

This patent can be combined with Thomson's Patent Spindle (with oil groove).

WE SHOULD BE PLEASED TO SEND YOU SAMPLES.

ANYONE CAN PLAY IT.

Pieces which it would take twenty years to master can be played at sight, and played artistically too.

It will give the most marvellous reproduction of Solo Playing, but it does not stop there.

It will execute things which no performer could dream of attempting.

To the already large repertory of Standard Pieces constant additions are being made to suit every taste.

"OVERCUT" SPIRAL CUTTERS,

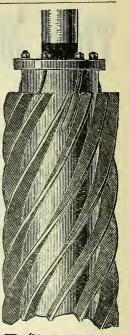

The great ADVANTAGES of which are now admitted by all who have adopted them.

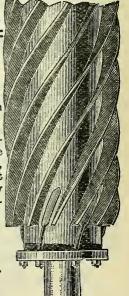

- I. FAR BETTER CROPPING IS OBTAINED.
- II. MOST ECONOMICAL IN USE, requiring much less attention than any other type of spiral.
- III. GREATLY INCREASED OUTPUT. Without increasing the speed of the spiral cylinders the delivery speed may be greatly increased, giving even then a finish quite equal to that given by any other spiral at half the delivery speed. Made in all sections for every purpose where file-edge spirals are in use.
